Thursday November 13th: 3:00-4:30pm Shorewood Office

Department of Public Works

STREETS & TRAFFIC: DPW crews are working on replacing the signage throughout the annual street re-paving program limits, W. County Line Rd., and W. Dean Rd. New street identification signs will be installed throughout the next few weeks.

Crews are filling potholes along W. Bradley Rd. between N. 60th St. and N. Teutonia Ave. with cold-patch asphalt. W. Bradley Rd. requires routine maintenance due to the failing concrete surface. W. Bradley Rd. between N. 51st St. & N. Sherman Blvd. is scheduled for pavement replacement and reconstruction next summer (2015).

W. COUNTY LINE ROAD RECONSTRUCTION:

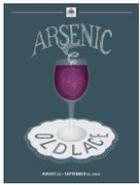

The project substantial completion date is November 15th.

The contractor, Payne & Dolan finished the final lift surface course asphalt paving work on Saturday, November 1st. Subsequently, the pavement marking was completed on Monday, November 3rd. Remaining project work includes gravel shouldering, regulatory sign installation, and mailbox resetting/replacement. Additionally, general site landscaping and clean-up is expected to occur within the next 2-weeks. Any remaining landscaping work (i.e. grass seeding) will be completed in the spring of 2015.

W. DEAN ROAD RECONSTRUCTION: The estimated project completion date has shifted out to November 15th.

All concrete flat-work is expected to be completed by the end of the week, ending November 7th. The earthwork contractor, Baumhardt Sand & Gravel, is on-site undercutting the south side of Dean Road between N. 46th St. and N. Meadowside Court adjacent to the Brook Lane Apartments due to soft sub-grade material which failed during the proof roll. Asphalt paving will start at N. 46th St. and move west to N. 55th St. so as not to interfere with the subgrade undercutting work. The project limits are from N. 55th St. east to N. Teutonia Ave.

Brown Deer Fine Arts Department

Weekly Health Tip

November is a National Diabetes Month

Learn about diabetes and how it
relates to your family history.

Diabetes can be prevented by
learning your risk factors and
making appropriate lifestyle
changes.

In addition, changing your diet,
increasing physical activity and
maintaining healthy weight are
some ways to stay healthy longer
and reduce your risk of diabetes.
