Weekly Health Tip

During the summer months, many people take food on the road with them. Whether it is a day trip to the beach, a few days on the boat, or a week in an RV or at a campground, make sure that the food you pack remains safe to eat.

For example, pack perishable foods directly from the refrigerator or freezer into the cooler. Meat & poultry should be frozen. A full cooler will maintain cold temperatures longer than a partially filled cooler. Store the cooler in the shade and cover it with a light-colored blanket or tarp to reflect heat.

For other ways to handle food safely while on the road, please visit USDA website at www.fsis.usda.gov

Village Feasibility Study – Update

After conducting a Feasibility Study on Brown Deer municipal buildings, consultants from Bray Architects identified the pressing need for major repairs and upgrades to the Department of Public Works Complex.

From this analysis two viable alternatives were presented to the Village Board: 1) Repair the current 1966 Public Works buildings in the Original Village neighborhood or 2) Pursue the construction of a new facility south of the existing Village Hall site.

The Village Board has directed Village staff and Bray Architects to further present these findings to the public. Residents are invited to any of the following events to gain an understanding of the issues and alternatives:

August 26, 2015: 5 – 7:00 p.m.
Public Information Session
Community Center
4355 W. Bradley Road

September 12, 2015: 10 a.m. - 5:00 p.m.
Public Works Building Open House
8717 N. 43rd Street
